ABOUT MOSQUITO REPELLENTS

REMINDER...
- In general, higher concentrations of active ingredient provide longer duration of protection.
- Concentrations above 50% do not offer a marked increase in protection time.
- Repellents do not protect all users equally. The effectiveness of a repellent depends on the mosquito species that is biting and chemical scents given off by the person using the repellent.
- Reapply repellents as protection wanes and mosquitoes start to bite.

Protect yourself and your family by taking extra precautions:
- Reduce the number of mosquitoes in your area by getting rid of containers with standing water that provide breeding places for mosquitoes.
- Try to avoid being outside during dawn and dusk.
- Wear clothing with long sleeves and long pants while outdoors.
- Wear light colored clothing (mosquitoes are more attracted to dark clothing).

REPELLENT SAFETY
Always follow label instructions when using repellents.
- Apply repellents only to exposed skin and/or clothing.
- Do not apply repellents over cuts, wounds or irritated skin.
- Do not spray repellent directly on your face, spray on your hands and then apply to face. Use repellent spray sparingly around eyes, mouth and ears.
- Do not allow children to handle repellent and do not apply to children’s hand. Apply repellent to your own hands first and then put it on the child.
- Use separate repellent and sunscreen products because they need to be reapplied at different times.
- Do not spray aerosol or pump products in enclosed areas.
- After returning indoors, wash treated skin and clothes with soap and water.

If you or your child suffers an adverse reaction following repellent use, discontinue use, wash affected areas and contact your physician.

OFFICE LOCATIONS AND HOURS OF OPERATION
Sacramento County
8631 Bond Road
Elk Grove, CA 95624
Phone: 1-800-429-1022
Fax: 916-685-5464

Hours: 7:00 am to 3:30 pm
THE BEST REPELLENT IS THE ONE YOU WILL ACTUALLY USE

Choose and use a repellent containing one of the following active ingredients so you can spend time enjoying the outdoors knowing you are protected from biting insects and the diseases they may transmit.

Consider these factors when choosing an insect repellent:

- How much time will you need to be protected from biting insects?
- What type of activities will you be performing during the time of protection?
- Be sure to use a product with a protection time that fits your activity and always follow the label directions to ensure proper use.
